TITLE OF INVENTION: protein, and uses thereof
FILE REFERENCE: Alpha-2B-AR variant
CURRENT APPLICATION NUMBER: US/09/422,985
CURRENT FILING DATE: 199-10-22
COURRENCE SEQ ID NOS: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              APPLICANT: Snapir, Amir
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ORGANISM: Homo sapiens
FEATURE:
NAME/KEY: CDS
LOCATION: (1)..(1341)
OTHER INFORMATION: Coding sequence for variant human
OTHER INFORMATION: alpha-2B-adrenoceptor protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                APPLICANT:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             880 GAGGATGAAGCTGAAGAGGAAGGAAGGAGGAGGAGGAGTGTGAACCCCCAG 930

GENERAL INFORMATION:

APPLICANT: Ryan; James W.

TITLE OF INVENTION: Genomic Polynucleotide Fragments From Chromosome 7

FILE REFERENCE: JR-14,000-US

CURRENT APPLICATION NUMBER: US/10/642,946

CURRENT FILING DATE: 2003-08-18

PRIOR APPLICATION NUMBER: US/09/957,956

PRIOR FILING DATE: 2001-09-21

NUMBER OF SEQ ID NOS: 8

SOFTWARE: Patentin version 3.1

SEQ ID NO 6

LENGTH: 45980

TYPE: DNA

OCANISM: Homo sapiens

US-10-642-946-6

Zorn.

CDNA was oligo dT primed from Sug of poly A+ RNA from EcoRI-NotI cut cDNA was then ligated into pCS107 with 5' end and NotI at the 3' end.

Yector: pCS107; Site 1: EcoRI; Site 2: NotI Host: Escherichia coIi xLI-blue.

//notes = "Organ: Brain and cDNA was size fraction all agarose
gel. First strand cDNA synthesis was primed with oligo-dT
primer containing a Not I site. Double strand cDNA was
size selected according to mRNA size fraction, ligated
with EcoR I adaptor, digested with NotI and then cloned
directionally into pYX-Asc vector. The library tag
sequence located between the Not I site and the polyA tail
is AGCAGACNG. This library was created for the University
Iowa Brain Anatomy Project (BMAP): 'Gene Discovery in the
Developing Mouse Nervous System', supported by National
Institute of Mental Health (NIMH), Hemin Chin, Ph.D.,
program coordinator."
